

TradeMaster[®]

the “absolute” scan/pack solution

⇒ Designed specifically for suppliers who wish to trade electronically with Australia’s major retailers* (and conventionally with others), **TradeMaster** is the “absolute” scan/pack solution.

⇒ Far more than standard scan/pack software, **TradeMaster** is the most advanced order processing, inventory management, pick, pack & dispatch system available today. Yet its powerful Windows[®] 95/98/NT/2000 interface effortlessly guides even the most novice user.

⇒ Utilizing bar codes & scanners, **TradeMaster** helps enforce quality control procedures at every step of the supply chain. The result: high management & customer satisfaction. What is ordered is picked, packed, invoiced, & dispatched in a timely manner.

⇒ Orders may be validated against a wide range of criteria e.g. stock codes, availability, pack sizes, wholesale pricing, retail pricing & SKU/Key codes, delivery locations etc. Wave or specific pick lists can then be created and pack lists generated by customer, order, store etc.

⇒ After order verification, unique displays guide all packing operations, dynamically displaying the contents & status of all cartons, pallets, consignments etc throughout the entire packing process. Alternatively orders may be downloaded to portable data terminals for remote/batch scan packing.

⇒ As required, customer specific shipping labels complete with unique bar coded SSCC numbers are printed, electronic Ship Notice/Manifest messages created and invoices printed. Inventory may be automatically updated, and consignment notes & manifests printed and/or transmitted to selected transport companies. Product bar-codes (EANs), pack bar-codes (TUNs), retail price/SKU tickets, carton/store labels, shipping labels (SCMs), transport labels and/or internal use labels may be created and printed on any Windows compatible bar-code printer.

⇒ **TradeMaster** will seamlessly interface with most existing in-house applications, allowing orders for all (or particular) customers to be picked, packed, invoiced & dispatched with the highest integrity. Stand-alone or networked multi-station **TradeMaster** configurations are available.

To find out more about the benefits of TradeMaster and electronic trading, contact Tailored Computer Systems Pty Ltd - phone (03) 9521 3200 or fax (03) 9521 1023
